

Feature Story

Construction industry enthusiastic about robot application

In a recent surge of technology innovation, the construction industry is undergoing a monumental transformation, where metal arms and artificial intelligence are set to lay the bricks for the future. At the helm of embracing the integration of robotics, the Construction Industry Council (CIC) takes an active role in facilitating industry stakeholders to gear up and be future-ready. Workshops showcasing ready-to-market construction robots were organised for industry stakeholders to evaluate their capability before adoption, and provide training and education in using the construction robots.

CIC Construction Digitalisation Award

This Award recognises outstanding local projects and local organisations for their contribution in the promotion and adoption of digitalisation tools and workflows and in bringing about innovation in these areas to improve productivity, quality, sustainability and safety, with measurable KPIs.

The knowledge and experience of the digitalisation leaders will be shared with the industry through post-award seminars and workshops.

專題故事

建造業熱切歡迎建築機械人「投身」業界

創新科技發展一日千里，建造業正在經歷一場重大轉型，未來的建築將由機械臂和人工智能建成。建造業議會走在推動機械人應用的最前線，積極協助業界準備迎接建築機械人主導的未來。議會舉辦了工作坊，展示市場上現成的建造機械人，讓業界代表即場評估這些機械人的能力，又就這些機械人的使用方法提供培訓。
